

# Together, we can shape the future of HIV and STBBI research in BC & Yukon

## What is the CTN+?

A network of researchers, people with lived and living experience, community organizations, and service providers across Canada who support high-quality research aimed at improving prevention, care, and well-being for those affected by HIV and sexually transmitted and blood-borne illnesses (STBBIs).

### 4 Think Tanks

- Prevention & Testing
- Treatment & Management
- Cure & Immunotherapies
- Methods

### 5 Regional Teams

British Columbia & Yukon, Prairies, Ontario, Quebec, Atlantic

## The CTN+ BC & Yukon Regional Team

A dedicated network and a portal of opportunities

Supports collaborative and investigator-driven research that addresses the unique priorities of communities facing HIV & STBBIs in BC and Yukon.

## Why join the BC & Yukon Team?

### Drive collaborative research through partnerships

- Connect with allies in the network, including Scientific Think Tanks that accelerate innovative research in their areas of expertise.
- Leverage the diversity of ideas and expertise across geographical boundaries, both regionally and nationally.

### Build or strengthen your research capacity

- Gain training and mentorship, support with various stages of conducting research studies, and access to other technical resources and assistance to help launch your research project.

### Inform current and future research

- Apply your local knowledge, lived experience, or cultural principles to initiate or guide research and knowledge translation efforts and inform regional priorities.

### Stay up-to-date with the HIV & STBBI research arena

- Get updates on enrolment status of research studies, emerging evidence, funding opportunities, partnerships, and other exciting news in this area.
