

Together, we can shape the future of HIV and STBBI research in BC & Yukon

What is the CTN+?

A network of researchers, people with lived and living experience, community organizations, and service providers across Canada who support high-quality research aimed at improving prevention, care, and well-being for those affected by HIV and sexually transmitted and blood-borne illnesses (STBBIs).

4 Think Tanks

- Prevention & Testing
- Treatment & Management
- Cure & Immunotherapies
- Methods

5 Regional Teams

British Columbia & Yukon, Prairies, Ontario, Quebec, Atlantic

The CTN+ BC & Yukon Regional Team

A dedicated network and a portal of opportunities

Supports collaborative and investigator-driven research that addresses the unique priorities of communities facing HIV & STBBIs in BC and Yukon.

Why join the BC & Yukon Team?

Whether you are an early- or mid-career researcher, as part of our regional network you will have the opportunity to:

Collaborate with diverse researchers and stakeholders

- Connect with allies in the network, including **Scientific Think Tanks** that accelerate innovative research in their areas of expertise.
- Leverage the diversity of ideas and expertise across geographical boundaries, both regionally and nationally.
- Co-lead multi-site **Flagship trials** with researchers in other provinces.

Strengthen your research capacity

- Gain **training and mentorship**, support with regulatory, methodologic, and knowledge mobilization needs, and access to technical resources to help launch your research project.
- Get access to **funding opportunities and in-kind research services** through **funding opportunities and in-kind research services** addressing CTN's current scientific priorities) or smaller **Seed Funding projects** (serving regional priorities).

Stay up-to-date with current and future opportunities

- Get updates on enrolment status of research studies, emerging evidence, funding opportunities, partnerships, and other exciting news in this area.
